Steve Johnson
Anti-Bio Technology

Re: Anti-Bio System

Dear Steve,

Thanks for your support in offering us the Anti-Bio technology as a trial in Phuket.

I would like to mention the benefits we've received:

As you know our pool is 30% finished with sandwash and also has live plants in the water environment. As you know, prior to our trial of Anti-Bio technology, we had the best dual system salt-water chlorination system in place along with Sand Filters. Even with that system, we had a serious problem with algae growing on the sandwash especially under the tables where it was difficult to clean. We were cleaning the sandwash by hand weekly and still had green algae everywhere.

Now that the Anti-Bio system has been in place for over a month. Our water is sparkling clear, no algae on the sandwash and no more brushing algae off the sandwash, even the underside of the tables is clean now. Also, we are able to maintain our chlorine levels at between 1.0 to 1.5 by the salt water chlorination system. Customers notice that the water is fresh and even tastes good with no chemical smell. Also, we use no more chemical additives to control PH or chlorine levels anymore.

If you would like to show our pool, please feel free to bring customers over to our resort and inspect the pool and system.

Kind Regards,
