

**AntiBio**  
TERMITE CONTROL

**ANTI BIO TERMITE CONTROL USES  
PATENTED TECH TO DISRUPT AND  
EXPEL ENTIRE TERMITE COLONIES**

**Anti-Bio Termite / TTM Series  
Model TTM 1000 Termite control  
Yellow**

**ACTIVATORS, WRAPS AND POWER  
PACKS:** TTM 1000 Standard system  
includes five activators, 1 large wrap  
& 1 power pack

**Your home. Your most valuable asset**

Termites can invade your home destroying your house and precious valuables without you even realising, until its too late.

We assure you, if you find termites you are not alone. We have found cases where the pesky termites have made a meal of everything in the house, complete structural damage, roof timbers, kitchen units, skirting boards, picture frames, furniture and even clothes.

*All systems have a working guarantee of three years on all parts. No general service or maintenance is required. Prices as of 15th September 2018*

**Patented TTM System**

The Ant Bio Termite Technology Management ("TTM") system is a preventative measure for termite management using a computer microchip to induce sweeping sound frequencies through activators.

**Sweeping Sound Frequencies (SSF)**

The system is comprised of 2 main elements: a control unit and activators. The activators are positioned at the exterior corners of the dwelling allowing the SSFs to penetrate the target areas, thus providing a termite barrier to entry and / or disturbing existing termite activities and colonization.

**Penetrates hidden termite colonies**

Termites thrive so successfully from their ability to live within timber, underground, and even in concrete. They avoid coming out in the open, often not discovered until infestation becomes acute and the structure is compromised.

**Save money, save the planet**

The patented TTM System is an alternative system to current control methods. It reduces the reliance on traditional termite management methods, including the use of toxic chemicals. Helping improve your health, and helping to save money.

**System Warranty**

The system comes with a two-year warranty. Being fully automated, it does not require any maintenance or replacement parts.

**Effective for up to 15 years**

This sturdy unit has an estimated life span of ten to fifteen years.

**24-hour protection**

Anti Bio Termite Control works 24/7 to disrupt entire termite colonies. Powerful low frequency soundwaves create a barrier for your home, even while you sleep.

*All systems have a working guarantee of three years on all parts. No general service or maintenance is required.*

## ANTI BIO CELLAR CONTROL FOR GUARANTEED HEALTHIER, CLEANER BEER WITHOUT THE CHEMICALS

CellarControl Series  
Model CC1/CC2/CC3&CC4  
Beer systems  
Silver <24 beer lines  
Purchase/rental

This technology has been laboratory tested with proven results in more than 4000 outlets in 24 countries.

### Proven technology in the cellar industry, for over a decade.

CellarControl cleans your current beer line system using low frequency Sweeping Sound Technology. Used globally since the early 1990's. It's scientifically tested and proven to combat line buildup and associated bacteria to ensure clean beer lines and great quality beer at all times. The result? Better beer, happier customers and increased profits.

### Patented Advanced Preventative Technology (APT)

Every Cellar Control system features a control unit and up to 6 activators (one activator for each main drop lead line, installed at the keg). The activators treat the beer lines 24 hours a day, 7 days a week, using sweeping sound frequencies to prevent biofilm build-up on the beer lines, which means you only have to do a line clean every 6 weeks, providing a cleaner, greater tasting beer – every time. The system is unobtrusive and uses little power.

### Less beer wastage, less chemical usage and lower labour costs.

With Cellar Control installed, you only need to clean your beer lines every six weeks!

### Save time and money.

Less beer wastage, reduced chemical usage, and less labour costs you'll be saving noticeable amounts each month, each quarter, each year.

### Cost-effective installation and maintenance.

CellarControl installs onto your existing beer lines, with virtually no modifications to your existing setup

The system works for you 24 hours, 7 days a week to slow down harmful beer line growth. You complete your beer line cleans the same way – only less often.

Anti Bio Cellar Control is capable of treating an infinite number of beerlines. The system can be configured to treat more than one inlet pipe with the addition of extra activators, all within the area of one cellar.

**ANTI BIO WATER TECHNOLOGIES IS THE SMART WAY TO CLEAN WATER WITHOUT USING CHEMICALS**

Anti Bio Water Technologies products are designed to assist swimming pool owners and resort managers in maintaining clear, healthy pool water while reducing chemical usage, maintenance expenses and time, in any sized pool.

**Clear benefits**

**REDUCTIONS IN:**

- Chemical usage/water consumption
- Backwashing / labour time
- Chloramines
- Algae & residue build up
- Biofilm removal from filters
- PH level fluctuations
- Health & Safety risks

**Results for pool management**

- Money savings and environmentally friendly savings
- Increased leisure time
- Odour reduction / Bather satisfaction increase
- Plant life extension / Bather satisfaction increase
- Increased filtration efficiency and improved water clarity / maintenance reduction
- More easily balanced water
- Lower bacterial counts

**Wide range of applications**

Anti Bio Water Technologies have been proven effective in a range of applications, from the world's largest theme parks, to everyday home pools and spas around the world.

**Maintenance-free**

Our patented Sweeping Sound technology requires very little, if any maintenance.

**Models**

There are 2 series of Anti Bio Systems, each with 3 models designed to cater for various volumes of water.

**visit: [antibio.com.au](http://antibio.com.au)**

**ACTIVATORS, WRAPS AND POWER PACKS:**

**ABS Models**

ABS 5000 Standard system includes five activators, 1 large wrap & 1 power pack  
ABS 2000 Standard system includes three activators, 1 large wrap & 1 power pack

**ABT Models**

ABT 5000 Standard system includes two activators, 1 medium wrap & 1 power pack

Anti Bio Technologies are capable of treating different volumes of water. The system can be configured to treat more than one inlet pipe with the addition of extra activators, within the area of one plant room.

**ABS Series**

The ABS series treats volumes of water ranging from 400,000 litres upwards.

**ABT Series**

The ABT series treats volumes of water ranging from 100,000 litres to 399,999 litres of water.
